

## Junior Business Analyst

Your career as a Business Analyst starts here!!!

We are looking for a Junior Business Analyst to join our IT department. Imagine getting your dream job ahead of the rest or you are ready to start immediately. Either way we are ready to talk to you as we offer flexible working hours in a fun team environment.

### **About GloBird**

GloBird Energy is an Australian owned and operated, next-gen, budget-friendly energy retailer. Founder John McCluskey had grown frustrated with giant 'power hungry' companies who had lost sight of customer care in favour of profits, and together with some friends he focused on delivering both low prices and customer satisfaction. We are proud and humbled for the multiple MOZO award wins under our belt (2017, 2018 & 2019) for our bill-busting low rates in Victoria, and more recently we have rolled our amazing offers to other states.

### **Your opportunity**

At GloBird, we are looking to reinvent the whole energy industry through technology and innovations, to be a disruptive energy technology business and a future leader of the industry. The IT team is the core part of the business and responsible for the continued operation and innovation of these systems. We are uniquely placed to be able to develop innovative technologies, assist in optimising business processes and reduce manual effort through technology solutions.

### **What you will do**

This role requires someone who is open-minded, has high attention to detail and a strong ability to research and apply what they have learned. As a part of your daily responsibilities:

- You will propose effective approaches to business and technical requirements
- You will regularly engage with the business, development and test teams to enhance the organisation's capabilities
- You will drive the design and delivery of specific solutions through proactive consulting and advice to business units
- You will provide documentation and support
- You will actively contribute to our continuous improvement processes
- You will take part in project management responsibilities for larger scale projects

### **How you will succeed**

Some of the key skills and qualifications you will need to help you be successful in this role:

- A Bachelor's degree or above
- Strong process skills and attention to detail
- Good communication skills, both written and verbal
- A dedicated team player

- Documentation skills
- Outside-of-box thinker
- Problem solving & troubleshooting skills, with a systematic approach to breaking down complex problems
- Experience working in agile delivery environment
- SQL as a bonus skill

We are inspired by an individual's potential. We value integrity, commitment, and understanding before experience and qualification. If you have a can-do attitude, enjoy learning, love challenges and are keen to improve, this could be the job for you!

We want someone who can contribute to overall business success!!!

In return, you will receive:

- A generous Base Salary + Bonuses + Super
- Ongoing support, training, and career development
- An enjoyable, dynamic cultural environment, in a great team
- Career growth opportunities as we grow
